INDIANA'S CORE STANDARDS:

Core Academic Concepts Across the K–12 Continuum
A Companion to Indiana's Academic Standards

SOCIAL STUDIES

Kindergarten – Grade 12

Effective curriculum, instruction and assessment do not happen by accident. They are the result of many people planning together, working together and sharing responsibility for the success of all students.

A great deal of work has gone into developing resources to help educators plan curriculum, instruction and assessment. What has made the development process so successful is the grassroots involvement of people statewide. The collaborative efforts and dedication of teachers, administrators, state educational organizations, parents, business leaders, higher education faculty, Indiana Department of Education staff, Board of Education members, Indiana's Education Roundtable and the public have contributed to the creation of quality resources for our teachers.

To continue this work, Indiana has adopted *Core Standards: Core Academic Concepts Across the K-12 Continuum*. The *Core Standards*, a complement to *Indiana's Academic Standards*, explicitly highlight the “big ideas” for each grade level and content area, give proper weight to concepts central to advancement across subsequent grade levels, allow for instructionally-supportive assessments, and encourage the integration of curricula across content areas. The *Core Standards* build upon *Indiana's Academic Standards* by integrating multiple Standard Indicators into a small number of instructionally-coherent targets that reflect priorities for each school year or course.

It is our sincerest hope that the *Core Standards* help teachers' efforts in defining and developing curriculum, selecting instruction, assessing student outcomes and integrating content areas when appropriate to support the success of Indiana's students.

Purpose of the Core Standards

The Core Standards invite new ways of aligning K-12 curriculum and assessment to *Indiana's Academic Standards*.

Core Standards in the Classroom

The teachers can use the Core Standards to:

- help students focus on the key concepts (the most important Standard Indicators necessary for understanding the “big ideas”) of each grade level and content area;
- help parents understand the most important concepts to be learned at each grade level;
- inform decision-making when planning and delivering instruction and designing assessment;
- create more focused goals for student performance at the end of each school year; and
- communicate to administrators, school officials and the public that Indiana continues to strive for high standards in education.

Core Standards in the Education Community

The public can use the Core Standards to:

- gain a clearer understanding of what is expected of Indiana students and teachers;
- enhance discussions of ways to integrate curriculum, instruction and assessment;
- engage in conversations regarding professional development within the K-12 environment;
- explore collaborative opportunities between K-12 teachers and higher education faculty; and
- discuss conceptual learning across and outside the education community.

THE CORE STANDARDS:

- Highlight the most important concepts presented in each grade level and content area by integrating multiple Standard Indicators from *Indiana's Academic Standards*;
- outline a manageable number of concepts that all students must understand and be able to do at the end of the year;
- emphasize the concepts that are central to each grade and are connected to subsequent grade levels;
- set challenging and explicit goals that delineate which Standard Indicators should receive the most instructional time;
- support the development of assessment that is focused on concepts that are central to a grade level or content area;
- enable teachers to assess critical skills in greater depth and use student responses to guide further instruction; and
- provide the opportunity to integrate multiple content areas in the classroom by analyzing the connections among the manageable lists of concepts in each grade level and content area.

CORE STANDARDS

The *Core Standards* represent ideas that are broad in scope and encompass multiple Standard Indicators. Students should be proficient in these *Core Standards* in order to successfully move on to the next levels of Social Studies.

Core Standards for Kindergarten Social Studies

CORE STANDARD	1
---------------	----------

History

Past and Present

Explore differences and similarities in the lives of children and families of long ago and today. Identify famous Americans from the past who have shown courageous leadership, and sequentially order events of the past.
